

- The administrator must be able to modify the background of the homepage by uploading an image, or keep the current blank background.
- I cannot find the access/section that allows me to modify the homepage.
- I cannot find the new restaurant job offers that are waiting for approval, nor can I view their full details before they are published.
- I cannot specify the reason for rejecting a candidate's photo. Currently, there are only two options: "Accept" or "Reject". The administrator must be able to select or enter a rejection reason so that the candidate understands why the photo was rejected and can upload a compliant photo.
- **Statistics:**
 - Number of new candidates registered per day.
 - Number of new candidates by job position.
 - Number of new employers registered per day and per month.
 - Number of establishments by type (restaurants, hotels, etc.).
- I do not have a candidate database/CV database containing the complete list of candidates, with the ability to export the data to Excel.
- I do not have any management actions for published job offers, such as republishing or extending an offer.
- **All employer job offers must be reviewed and approved by the administration before they are published on the platform.**

ADMINISTRATOR ACTIONS

The administrator must be able to:

- View the complete profile.
- Edit the profile.
- Verify the profile.
- Deactivate the profile.
- Delete the profile.
- Restore the profile.
- Add a skill.
- Correct/edit information.
- View the profile history.
- View applications.
- See which employers have requested the candidate's contact details.
- Approve or remove published photos.

15. EMPLOYER MANAGEMENT

The administrator must be able to:

- View the employer's information.
- View the number of job offers published.
- View the number of active job offers.
- View the number of applications received.
- View the number of candidate profiles viewed.
- View the number of contact requests.
- View the number of reported/declared hires.
- View the employer's latest activity.
- See how many candidate contact details each employer has requested and whether the employer is actively publishing job offers.

Employer Job Offer Filters

The administrator must be able to filter offers by:

- Active
- Pending approval
- Expired
- Closed
- Rejected

Actions on Each Job Offer

The administrator must be able to:

- Edit
- Approve
- Reject
- Deactivate
- Extend exceptionally
- Republish
- Delete

16. PLATFORM STATISTICS / LABOR MARKET DATA

The platform should provide statistics including:

- Most searched job positions.

- Most searched cities.
- Average salaries offered.
- Other relevant labor-market statistics that can be derived from the platform's data.

The administrator must be able to approve or delete inappropriate photos.

If a user uploads abusive or inappropriate content, the administrator must be able to block the account.

17. APPROVAL NOTIFICATIONS

- After an administrator approves a candidate profile or job offer, the user/employer must receive a notification on the platform and an email confirming the approval.
- In the job offer management section, approved offers must be clearly identified as approved (for example, displayed in green) or removed from the pending approval list.
- If a candidate's photo does not meet the required quality standards, the candidate must be notified immediately after the upload, with a clear explanation of why the photo was rejected and what needs to be improved.
- Photo rejection reasons should be predefined where possible, with options such as:
 - Poor image quality
 - Face not clearly visible
 - Multiple people in the photo
 - Inappropriate content
 - Photo does not meet platform requirements
 - Other reason (with the possibility for the administrator to add a custom explanation)

18. ADMINISTRATOR ROLES AND PERMISSIONS

The platform must allow the Super Admin to create internal administrator accounts with limited permissions.

For example:

- An internal administrator may have permission only to approve/reject photos and job offers.
- Another administrator may have access to candidate management but not sensitive candidate contact information.
- Another administrator may have access to platform statistics only.

The Super Admin must retain full control over all administrative functions and permissions.

Administrator permissions should follow the **principle of least privilege**, meaning each administrator should only have access to the functions and data required for their role.

19. USER FEEDBACK / SUPPORT

- The administrator must be able to view and respond to user feedback and messages.
- When an administrator responds, the user must receive:
 - An in-platform notification.
 - An email notification.
- The conversation/history between the user and the administrator should remain accessible from the admin dashboard.

20. SECURITY AND DATA PROTECTION — DEVELOPMENT REQUIREMENTS

- Candidate phone numbers and other sensitive personal information must be protected and accessible only according to the platform's recruitment and privacy rules.
- Employer access to candidate contact details must be logged and traceable from the admin dashboard.
- The platform must maintain an activity/audit log for important administrative actions and for access to candidate contact information.
- Uploaded photos and files must be validated before storage, including:
 - File type.
 - File size.
 - File format.
 - Security checks.
- The developer must implement appropriate protection against:
 - Malicious files.
 - Automated abuse/bots.
 - Unauthorized access.
 - Brute-force attacks.
 - Unauthorized database access.
 - Other common web application security threats.
- Candidate contact information must **not** be exposed through the frontend, APIs, URLs, browser source code, or other unauthorized mechanisms.
- Access to sensitive candidate information must be controlled through server-side authorization and must never rely solely on frontend restrictions.
- The exact data protection and privacy workflow must be defined and implemented **before employers are given access to candidate contact information**.
- The platform should maintain an audit trail showing:
 - Which employer accessed a candidate's contact information.
 - Which candidate's information was accessed.

- When the access occurred.
 - What action was performed.
 - Which administrator performed sensitive administrative actions.
- Administrative actions involving candidate data, account suspension/deletion, offer approval/rejection, photo moderation, and access to sensitive information should be logged and retained securely.
